TURKEYS

Production, Disposition and Gross Income, 1965-66

Gross Income: Gross income from turkeys in 1966 reached a new high for the fourth consecutive year totaling \$483.3 million. This was 15 percent above the 1965 gross income of \$421.3 million. The average price received during 1966 for turkeys marketed was 23.0 cents per pound compared with 22.2 cents per pound in 1965.

All regions shared in the increase in gross income with sharpest gains shown for the South Central and South Atlantic regions with 25 and 18 percent, respectively. The North Atlantic and East North Central regions both increased 11 percent. A 12-percent increase was shown in the West North Central region and the Western region advanced 14 percent.

Number Raised: Turkeys raised in 1966 totaled 115.5 million birds, 9 percent more than the 1965 crop and a record high. Production of turkeys during 1966 totaled 2,105 million pounds, up 10 percent from the 1965 production.

Turkey growers raised 99.6 million heavy breed birds in 1966 compared with 93.6 million during 1965 -- an increase of 6 percent. Light breed turkeys raised totaled 15.9 million birds, an increase of 29 percent from the 1965 total of 12.3 million.

Increases in the number of turkeys raised occurred in all regions of the United States during 1966. The sharpest gain was in the South Central region with a 21 percent increase over 1965. Increases for other regions were as follows: South Atlantic and West, both up 10 percent; North Atlantic, up 7 percent; West North Central, up 6 percent; and the East North Central, up 4 percent.

Turkeys Sold: Sales of turkeys during 1966 were 9 percent higher than in 1965 and totaled 114.8 million birds compared with 104.9 million birds sold in 1965. Growers reported that 67 percent of the light breeds and 8 percent of the heavy breeds were sold as fryer-roasters. The total pounds of liveweight turkeys sold in 1966 amounted to 2,097 million pounds compared with 1,901 million pounds in 1965 -- an increase of 10 percent.

January 1 Breeder Hens: Turkey breeder hens on farms at the beginning of 1967 totaled 4,211,000 birds, up 7 percent from the 3,920,000 birds a year earlier. Heavy breed hens on hand January 1, 1967 totaled 3,708,000, an increase of 7 percent from the January 1, 1966 number. Light breed hens numbered 503,000 birds on January 1, 1967, up 8 percent from a year earlier. The number of other turkeys (market birds and breeding toms) on January 1, 1967 totaled 3,129,000 birds -- 5 percent above the beginning of 1966.

Death Losses: Death loss of poults for 1966 was 10.0 percent of those bought or home hatched -- a one-percentage-point increase from the 1965 death loss. Loss of breeding stock during 1966 as a percent of breeders on hand January 1, 1966 was 5.7 percent compared with 5.3 percent a year earlier.

Revisions in Estimates: The production, disposition and gross income estimates for turkeys for 1960-64 have been revised on the basis of data obtained from the 1964 Census of Agriculture taken in the fall of 1964 and other data which have become available since the original estimates were made. Revised estimates for the years 1960-64 are shown in Statistical Bulletin No. 396, "Turkeys, Farm Production, Disposition, Gross Income, by States." This bulletin is available on request.
